

Subjective: Patient reports cervical pain 3/10 today. States turning head to left is easier this week. Still has difficulty looking up for more than 10 seconds.

Objective: Cervical AROM: flexion 45deg, extension 25deg, rotation R 70deg L 55deg. Cervical lateral flexion R 35deg L 30deg. Manual muscle testing: cervical flexors 4-/5, extensors 4/5. DNF endurance test: 18 seconds (goal 30s).

Assessment: Progressing toward goals. Cervical strength improving. ROM deficits persist in extension and left rotation.

Plan: Continue cervical stabilization exercises. Progress DNF endurance program.

Add: light resistance band rows. Continue 2x/week. Reassess in 2 weeks.
